

Give your press a second life!

Take the opportunity to Upgrade and Update your press!

Do you have a Bucher pneumatic press such as a RPM, RPX, RPA, RPZ, RPZI, XPert V1, XPert V2?

You may qualify for a press upgrade...

What is an upgrade?

- The automation of the press controls are upgraded with new physical and electrical components.

What are the benefits?

- Must yield is of better quality (lower solids).
- Bucher Organ, Automatic and Sequential qualitative pressing programs for operating.
- Friendly, ergonomic press controls thanks to a large LCD screen.
- Ability to connect to an Ethernet network.
- Compliance with the latest safety and environmental regulations.
- Economic longevity and availability of spare parts.

Bucher RPA

Bucher RPX

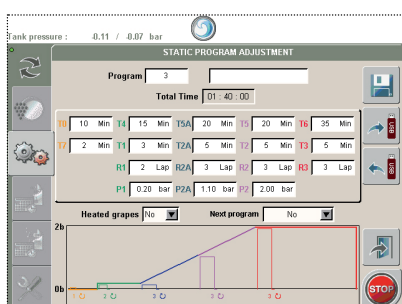

Bucher RPZ

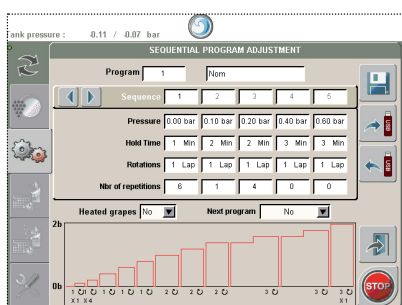

Bucher XPert

Bucher PLC

«Automatic» program

«Sequential» program

How can you get this service?

This upgrading is available in 3 steps:

• 1st step – we make an evaluation

This step is essential to check if your press is upgradable.

Provide the following information: brand, model, capacity, optional equipment...

• 2nd step – we send you a customized quotation

According to the information indicated on the diagnostic sheet.

• 3rd step - Installation/Short training

A Bucher Vaslin approved technician will install all parts and provide on site training to utilize your new PLC.

How do we proceed?

The upgrading of the automation is as much for Bucher presses as well as any other «old generation» models. This is made possible thanks to:

- The supplying of a remote or integrated control panel equipped with a «new generation» automation: thus, the operator can use all the Bucher programs, up to 20 «Automatic» programs with dynamic draining and up to 20 «Sequential» programs adapted to any type of grape varieties including the Crémant whole cluster and fermented reds.
- Setting up of an electrical box or an electrical breadboard adapted to the press model and in compliance to the current European regulations.

What are the Bucher Vaslin commitments?

- Parts are under warranty for 1 year.
- A stock of spare parts available from our company.
- Technical support ensured during harvest.
