## The benefits

---

### Adaptability

The Bucher XPro pneumatic press has a sliding door. Its large opening makes it easy to fill the press and also makes it easy to empty the pomace and to clean it.

Bucher Xpro has removable, perforated spouts, which makes it quick and easy to wash the press

The maceration function is included through the shutters at the end of the spouts.

The PLC has 6 modifiable, automatic programmes and two Prim'Step sequential programmes for the duration of the stages and the number of rotations at the end of the cycle.

The must is recovered easily with the juice trough on wheels under the press.

### Options

#### Axial filling

---

Only for Bucher XPro 15 presses

### Maintenance

The closed tank with perforated, self-cleaning gutters (Bucher patent) ensures the evacuation of musts during pressing and generates very low levels of sludge.

Easy to clean, thanks to Bucher Vaslin's patented perforated spout extraction system.

#### Electro-polishing of perforated trunking
