

 **Delta Densilys**

Delta Densilys

Densimetric sorting table

This sorting table separates either machine-harvested or hand-picked grapes from floating MOG such as leaves, bits of stems, stalks but also bugs, unripe berries, pips, skins, dry and shot berries... by means of a permanent evacuation device.

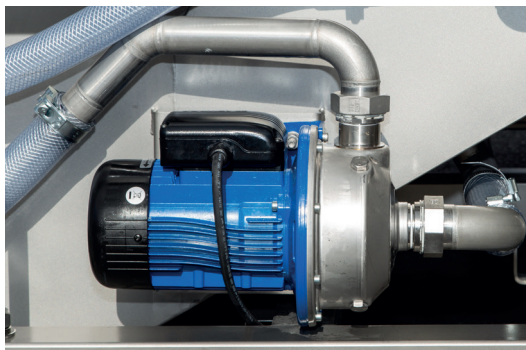

- Easy to use, it allows a clean sorting while preserving the grapes.
- Compact and equipped with an elevator, it reduces significantly your reception line.
- Its patented belt gently drains and conveys the grapes so as to preserve their integrity.

Patented draining and conveying belt

Waste evacuation screw

Circulating pump

Description

- Stainless steel hopper 7,5 Hl.
- Patented draining and conveying belt.
- Waste evacuation screw.
- Circulating pump.

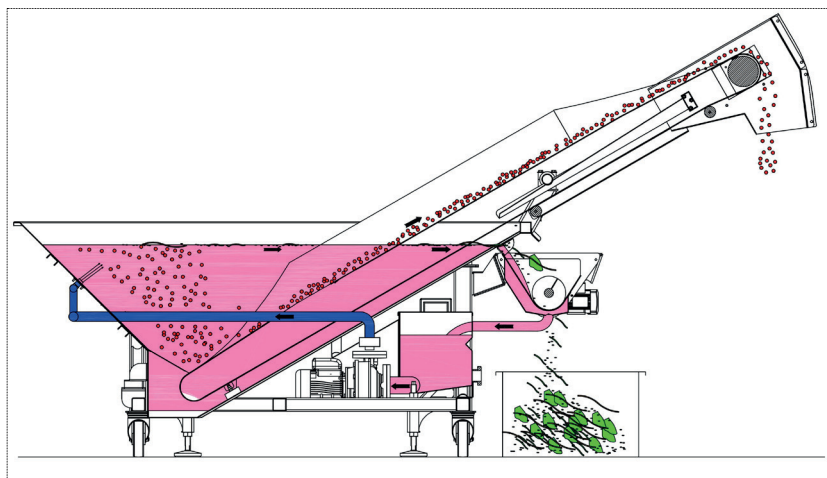

Fundamental assets

- Easy setting.
- Continuous MOG removal.
- Grapes cleaning and draining.
- Berries integrity is preserved.
- Compact, movable device.
- Belt elevator to lift the grapes.

Technical data

- Dimensions: L.3590 x w.1810 x h.1980 mm
- Flow rate*:
 - Up to 6 t/h for destemmed grapes and up to 4 t/h when washing whole grapes for Densilys XS
 - Up to 12 t/h for destemmed grapes and up to 7 t/h when washing whole grapes for Densilys XM

* depending on grape varieties, condition and grapes nature.
