

DS CO₂

Portable CO₂ detector

The DS CO₂ continuously measures the CO₂ in the air thanks to its high-precision measurement sensor. Operating with a visual (LED indicators) and audible (single, double, or permanent beep) alarm system, it guarantees the safety of cellar operators while ensuring an optimal level of protection. The use of a CO₂ detector is generally recommended by health authorities.

Advantages

- Updating the display every 5 seconds
- Control by alarm thresholds
- Non-dispersive infrared (NDIR)
- Easy to use
- Supplied with a calibration certificate
- Display in %
- Rechargeable battery
- Battery level check

Possibility of verification and/or calibration within the Dujardin-Salleron Laboratories. No need for periodic calibration.

Supplied with USB cable and belt clip

Ref. **199510**

Technical features

Measurement range	0,01- 1,00%
Response time	every 5 seconds
Resolution	0,01%
Accuracy	+/- 10% of reading
Autonomy	2000 hours
Warranty	12 months
Power supply	Lithium-Ion Battery 4,2V / USB C Cable
Dimensions, weight	160 x 70 x 30 mm, poids : 170g
